Art Unit: 3653

1. Applicant elects the invention of group 1 in the response filed on 09-26-05. The nonelected claims to 22-26 have been canceled.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1,3,4,5,7-11 are rejected under 35 U.S.C. 102(e) as being **anticipated* by *Waddell. Waddell discloses the apparatus to effect the method of providing a food display unit 52 for food items. Note in figure 1 the dispenser 66 for the food items having eating utensils*. Note in column 1 lines 45-49, the use of heating or having the food items cold*, and in figure 5 the use of shelves 22 for the food items.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over * Waddell. To provide that Waddell's dispenser would neither heat or have the food items cold would be obvious as a mere choice of utility to so dispense the items in any conventional food dispenser , as so desired, and therefore this feature is not afforded any patentable weight. **.

5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 12-21 and 27-39 are allowed.

7. Hall is cited disclosing figure 9 the further use of 'display' shelves for food items.
